

Our high-performance color MFPs will intelligently meet your business needs

Simple, secured and scalable, the RICOH IM C6500 and IM C8000 are productive, long-term solutions to your rapidly evolving business needs. These devices can give you the freedom to produce professional print collateral in-house, delivering both immaculate color and black-and-white output at the rated speed. Best of all, with our intuitive 10.1-inch Smart Operation Panel running the latest applications, these devices are easy to use.

Our high-performance all-in-one printers will meet a variety of business needs:

- Stunning color and black-and-white output is delivered at production pace
- Mobile workers can interact seamlessly with the Intelligent Devices
- Paper-based documents can be quickly digitized and uploaded to the Cloud
- You can install new features and applications as your business requirements change

Outstanding performance and quality are assured

Departmental powerhouses

Extending production-like performance to the office environment, the RICOH IM C6500 and IM C8000 are departmental powerhouses. Quality and performance go hand in hand. Vibrant, high-quality output is produced at express speed and can be folded, stapled, punched and bound inline, ready for distribution. Indeed, with the RICOH IM C6500 and IM C8000 on hand, professional results are assured whether printing everyday business communications or customer-facing marketing materials.

Productive future-proofed solutions

We understand that as your business grows, your workflow requirements are likely to change. The RICOH IM C6500 and IM C8000 are designed to support that growth. RICOH Always Current Technology allows new features to be installed on demand. Selecting from a range of smart applications, enhancements and software, you can update your RICOH Intelligent Device to meet changing requirements.

Easy and intuitive operation

Sharing the same intuitive interface as other RICOH Intelligent Devices, the IM C6500 and IM C8000 are incredibly easy to use. Ricoh's own smart applications automate everyday document processes. The large 10.1inch Smart Operation Panel is navigated with touch and swipe gestures, much like a smartphone or tablet. The touchscreen panel also supports the use of enterprise workflow solutions, such as RICOH Streamline NX, which enhance productivity, device/print management and security.

Cloud-based integration

To save time, double-sided originals are scanned in a single pass and can be uploaded to your electronic document management system. Indeed, with RICOH Smart Integration, the RICOH IM C6500 and IM C8000 will enable your employees to safeguard and share information more efficiently by uploading documents to cloud-based services — such as Dropbox[™], Google Drive[™], DocuWare[®] and Microsoft 365[®].

Versatile technology supports real business needs

Support mobile workers

With multiple ways to submit print jobs and our 10.1-inch Smart Operation Panel streamlining operation, our new high-end color MFPs are designed to meet the needs of large and increasingly mobile workforces. Employees and guests can connect seamlessly to RICOH Intelligent Devices and interact with them using their smartphones and tablets. Indeed, employees moving from one Ricoh device to another will find the intuitive technology instantly familiar and easy to use.

The advanced imaging system employs VCSEL technology (Vertical Cavity Surface Emitting Lasers) and ultrafine PxP toner to produce beautifully rendered output. Ricoh's PxP toner has a wide gamut and produces vivid, lifelike colors. The RICOH IM C6500 and IM C8000 support a wide range of media, including SRA3 paper and banner stock, and will even print full-bleed on three edges to produce professional-looking brochures. What is more, with precise registration assured, double-sided documents could not look sharper.

Professionally finish documents

In addition to meeting everyday departmental print needs, the RICOH IM C6500 and IM C8000 can be used to produce high-quality, customer-facing print collateral — such as brochures and mailing pieces. Indeed, with an array of productive in-line finishing systems to choose from, it's easy to print and fold personalized mailing pieces. Insourcing production will empower your business and ensure a fast return on your investment.

Reliable non-stop performance

Recognizing that your business will come to rely upon our technology, the RICOH IM C6500 and IM C8000 are designed to be more durable than regular office systems. To maintain productivity, toner and paper can be replenished on the fly. And, with a massive paper capacity and automatic tray switching, non-stop production is a reality. These features allow long print jobs to be scheduled to run overnight or at the weekend, ensuring the systems are available during office hours.

Easily tailored to your specific requirements

Dimensions are stated in width x depth x height (W x D x H)

RICOH IM C6500/IM C8000

MAIN SPECIFICATIONS

	IM C6500	IM C8000			
GENERAL					
Configuration	Console				
Printing process	4-drum dry electrostatic transfer system with internal transfer belt				
Warm-up time	45 seconds	40 seconds			
First output speed: B/W	5.5 seconds	4.8 seconds			
First output speed: full color	7.5 seconds	6.4 seconds			
Continuous output speed	65 ppm	80 ppm			
Memory: maximum	4 GB
